TRUONG NGUYEN GIA BAO

FRESHER FULLSTACK DEVELOPER

0865411146 | baotng8502@gmail.com | Ho Chi Minh City, Vietnam

github.com/Luwrng

PROFILE

Experience building React interfaces, reusable components, and REST API integrations through internships and team projects. Backend knowledge of Node.js and Java. Seeking a Fresher Fullstack Developer role to contribute frontend experience while developing API and data-handling skills.

WORK EXPERIENCE

NGUYEN LONG Furniture 06/2025 - 07/2025
IT Staff

- Processed and standardized Excel data, then transferred it into an internal application to support data entry.
- Contributed to the design and development of the company website, including interface implementation, feature integration, and revisions based on business requirements.

ANH QUAN TECH 03/2025 - 05/2025
IT Intern

- Developed web interfaces with React and Mantine UI, adapting layouts to different screen sizes.
- Built reusable components and organized interfaces into feature modules.
- Collaborated with the backend team to integrate APIs and display application data.
- Implemented form validation, page routing, and dynamic data updates.

PROJECTS

BRIDGETRAFFICDEMO - Vehicle Entry and Exit Management System 10/2026
Fullstack Developer | Personal Project

Web application that connects to RTSP cameras, recognizes license plates, and records vehicle entry and exit events with timestamps, gate information, and image evidence.

Technologies: HTML, CSS, JavaScript, C# / ASP.NET Core 8, Python, SQL Server, YOLO, PaddleOCR

- **Monitoring interface:** Built a multi-camera view with vehicle-area status and record searches by license plate, date, time, gate, and entry/exit status.
- **Backend and APIs:** Developed camera configuration and vehicle-record endpoints for viewing, editing, soft deletion, restoration, and manual exit confirmation when a camera misses an event.
- **License plate recognition:** Integrated YOLO for plate detection and PaddleOCR for text recognition; saved full-frame images and plate crops with each recorded event.
- **Entry/exit workflow:** Matched plates across cameras to identify entry and exit, limited duplicate records, and managed area occupancy and a FIFO vehicle queue.
- **SQL Server storage:** Designed tables for vehicle visits, camera events, and record adjustments to support searches and history review.

Result: Built independently in one week and tested with real camera feeds.

GitHub

PROJECTS (continued)

CLEAN FOOD VIET - Graduation Project 05/2025 - 09/2025
Frontend Developer

Technologies: React, JavaScript, Ant Design, Firebase Authentication, Cloudinary

• Contributed to customer-facing and admin interfaces using React.

• Built reusable components shared across pages.

• Integrated Firebase Authentication to send and verify phone-based OTPs.

• Integrated Cloudinary to support image management.

GitHub | Demo

PREGNANCY GROWTH TRACKING SYSTEM 01/2025 - 03/2025
Frontend Developer | Team of 5

Website for pregnancy tracking, experience sharing, and service package registration.

Technologies: React, JavaScript, HTML, CSS, REST APIs

• Developed React interfaces for pregnancy health tracking pages.

• Integrated APIs to retrieve and display data, collaborating with teammates to complete features.

GitHub

PAWTIME - Pet Care Services Website 09/2024 - 12/2024
Frontend Developer

Technologies: HTML, CSS, JavaScript

• Contributed to website layouts and interfaces presenting pet care services.

• Refined images, typography, and content layouts to improve interface presentation.

GitHub

SRU MANAGEMENT - Human Resource Management Application 09/2023 - 12/2023
Frontend Developer

Tools: Figma, Vite, Postman

• Designed attendance tracking and leave request interfaces in Figma.

• Developed frontend pages for attendance tracking and leave request management.

SKILLS

Programming Languages	JavaScript, TypeScript, Java, C#, Python
Front-end	HTML, CSS, React.js, Next.js, Redux, Tailwind CSS, Ant Design, Mantine UI
Back-end	Node.js (Express.js), Java (Spring Boot), C# (ASP.NET Core), Python
Databases	SQL Server, PostgreSQL, MySQL, MongoDB, Firebase Realtime Database
Tools	Git, GitHub, Vite, Swagger, Postman, Figma
Integrations	REST APIs, Firebase Authentication, Cloudinary, YOLO, PaddleOCR

EDUCATION

FPT University | 2021 - 2025

Major: Software Engineering
